

## Day 1 JavaScript Assignments

### 1.1 Objective:

To practice basics of JavaScript constructs.

#### 1.1.1 Problem:

Create an html page to enter details of voter with the field as below:

## Voter Form

---

Name	<input type="text" value="tom"/>
Age	<input type="text" value="15"/>
Result	not eligible
<input type="button" value="finish"/>	

Use javascript to check whether the person is eligible for voting or not.

Display the message in the page. If not eligible display it in red color.

### 1.2 Objective:

Working with JavaScript object creation.

#### 1.2.1 Problem:

. Create a form which takes the input for few products with details as below:

## Enter Product Details

Product Id :	<input type="text"/>
Product Name :	<input type="text"/>
Price :	<input type="text"/>
Quantity :	<input type="text"/>

Store few set of products on a button Add click and then display below, all the products added in a tabular form along with Total cost of the products at the bottom on the table in red and bold.

### 1.3 Objective:

To practice browser objects and their features.

#### 1.3.1 Problem:

Create a program for rotating the display of few set of images one after another using javascript as soon as the page is loaded.
